

Batch Export to a Movie File (.avi)

This Quick Guide outlines the steps to group several data documents (.cxd) into a Summary Document (.cxs) and then batch export each data document into it's own movie file (.avi).

1. Click the **New** button on the Main Toolbar or ctrl+n.
2. Select **Summary Document** and click **OK**.
3. Enter the name for the summary document.
4. Right-click **Collection** in the data tree of the summary document (cxs) and select **Add Files to Project**.
5. Select the data files (cxd) to add to the summary document by holding the ctrl key and using the mouse to select the files. Click **Open**.
6. Go to **File**, select **Export Collection** and select **Display Image**.
7. Enter a Directory Name and click **OK**.
8. Select **Movie File (.avi)** from Type drop list and click **OK**.
9. HImage will export each data file into a movie file (.avi).

Use Batch Export to export to the following file types:

- Tiff
- Multipage Tif
- OME Tif
